EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. As per MPEP 713.04, a separate interview summary form is not provided as the substance of the interview has been summarized herein.
3. The Examiner notes that the term, "computer memory medium" has not been explicitly defined in the specification. Based on what is disclosed in the specification, one skilled in the art would interpret the term to be limited to only tangible medium, which excludes any form of transmission medium and/or electronic signals. A telephonic interview held with Tomas M. Bonacci (No. 63,368) on 11/03/09 confirmed that this interpretation is in fact correct.

Authorization for this examiner's amendment was given in a telephone interview with Tomas M. Bonacci (No. 63,368) on 11/03/09.

The application has been amended as follows:

- **Please amend Claims 11 and 14 as follows.**

Claim 11. A method for ensuring that data generated by a client, comprising a first computing device, and subsequently stored in a persistent storage of the client have not been modified when the data are subsequently accessed for use by the client, the method comprising:

- the client computing a first digest from the data;
- the client sending the first digest to a server for signature computation;
- the server, comprising a second computing device, computing a signature for the first digest by utilizing a secure signing algorithm and a key, the key known only by the server and available for use only by the server;

Art Unit: 2435

the server sending the signature to the client for storage;
the client storing both the signature and the data in the persistent storage of the client;
before the stored data being subsequently used by the client, the client computing a second digest from the stored data;

the client sending both the second digest and the signature stored in the persistent storage to the server to verify that the stored data has not been changed;

the server receiving both the second digest and the signature stored in the persistent storage;

the server generating a temporary signature of the second digest by utilizing the secure signing algorithm and the key known only by the server and available for use only by the server;

the server comparing the temporary signature to the signature stored in the persistent storage;

when the temporary signature is equal to the signature stored in the persistent storage, the server sending a positive result to the client so that, upon receiving the positive result, the client uses the data;

when the temporary signature is not equal to the signature stored in the persistent storage, the server sending a negative result to the client so that, upon receiving the negative result, the client does not use the data;

wherein the data comprise a plurality of different sets of data, and the method further comprising:
obtaining a signer identification (SID) for the client, the SID uniquely indicating the client and not being controlled by an operator of the client;

on the server, using the key for computing an intermediate key from a concatenation of an arbitrary value and the SID;

sending the intermediate key from the server to the client;

using the intermediate key to sign each set of the plurality of different sets of data to produce the signature for the each set of the plurality of different sets of data; and

storing the signature, the arbitrary value, and the SID on the persistent storage.

Claim 14. The method of Claim 11, further comprising

determining if the SID that was obtained for the client is on a list of banned SIDs, and when so, indicating in the result that the data is not usable by the client.

4. The following is an examiner's statement of reasons for allowance: the arguments filed on 10/20/09 have been considered and are persuasive. The Examiner submits that the prior art of

Art Unit: 2435

record does not fairly suggest the claimed technique of ensuring that data has not been modified by utilizing a digest of the data in combination with the particular claimed key(s) to create a digitally signed digest; nor would it have been obvious to one of ordinary skill in the art at the time of invention to combine such features. Therefore, Claims 11, 14 and 19 are deemed allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to EDWARD ZEE whose telephone number is (571)270-1686. The examiner can normally be reached on Monday through Thursday 9:00AM-5:00PM EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kim Y. Vu can be reached on (571) 272-3859. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
